## FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 203

A meaningful search is not possible on the basis of all claims because none of the claims meets the requirements of Articles 5 and 6 PCT in that the matter for which protection is sought is neither defined in technical terms, nor disclosed in a manner that the person skilled in the art would be in a position to implement.

Furthermore, the claimed subject-matter can also be understood to cover :

- Scheme, rules and method for performing mental acts - Rule 39.1(iii) PCT
- Program for computers - Rule 39.1(vi) PCT

The applicant's attention is drawn to the fact that claims relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure. If the application proceeds into the regional phase before the EPO, the applicant is reminded that a search may be carried out during examination before the EPO (see EPO Guideline C-VI, 8.5), should the problems which led to the Article 17(2) declaration be overcome.
